

*Homology, Homotopy and Applications*

Volume **12**(1), 2010

1. The gluing problem does not follow from homological properties of $\Delta_p(G)$ Assaf Libman .....	1–10
2. Unstable module presentations for the cohomology of real projective spaces David J. Pengelley and Frank Williams .....	11–26
3. An algorithm for low dimensional group homology Joshua Roberts .....	27–37
4. Support and injective resolutions of complexes over commutative rings Xiao-Wu Chen and Srikanth B. Iyengar .....	39–44
5. On the Wu invariants for immersions of a graph into the plane Ryo Nikkuni .....	45–60
6. Model structures on modules over Ding-Chen rings James Gillespie .....	61–73
7. The $RO(G)$ -graded Serre spectral sequence William C. Kronholm .....	75–92
8. Algebraic cobordism and Grothendieck groups over singular schemes Shouxin Dai .....	93–110
9. Hopf cyclic cohomology in braided monoidal categories Masoud Khalkhali and Arash Pourkia .....	111–155
10. Rational generalized intersection homology theories Markus Banagl .....	157–185

*continued on the facing overleaf*

# *Homology, Homotopy and Applications*

Volume **12**(1), 2010

*continued from back cover*

11. Homotopy theory of dg categories via localizing pairs and Drinfeld's dg quotient  
Gonçalo Tabuada ..... 187–219
  
12. Categorified symplectic geometry and the string Lie 2-algebra  
John C. Baez and Christopher L. Rogers ..... 221–236
  
13. Divided power (co)homology. Presentations of simple finite dimensional modular Lie superalgebras with Cartan matrix  
Sofiane Bouarroudj, Pavel Grozman, Alexei Lebedev and  
Dimitry Leites ..... 237–278
  
14. The classifying topos of a topological bicategory  
Igor Baković and Branislav Jurčo ..... 279–300
  
15. An algorithmic approach to Dold-Puppe complexes  
Ramesh Satkurunath and Bernhard Köck ..... 301–326
  
16. The Horrocks correspondence for coherent sheaves on projective spaces  
Iustin Coandă ..... 327–353
  
17. Erratum to ‘Cofibrations in the category of Frölicher spaces: Part I’  
Brett Dugmore and Patrice Pungu Ntumba ..... 355–356
  
18. On trivialities of Stiefel-Whitney classes of vector bundles over iterated suspension spaces  
Ryuichi Tanaka ..... 357–366
  
19. La cohomologie totale est un foncteur dérivé  
François Lescure ..... 367–400
