

*Homology, Homotopy and Applications*

Volume **14**(2), 2012

1. $3 \times 3$ lemma for star-exact sequences Marino Gran, Zurab Janelidze and Diana Rodelo .....	1–22
2. A representability theorem for some huge abelian categories George Ciprian Modoi .....	23–36
3. Matrix factorizations over projective schemes Jesse Burke and Mark E. Walker .....	37–61
4. Formality of Koszul brackets and deformations of holomorphic Poisson manifolds Domenico Fiorenza and Marco Manetti .....	63–75
5. Grid diagrams and shellability Sucharit Sarkar .....	77–90
6. Automorphisms of Hurwitz series William F. Keigher and Varadharaj R. Srinivasan .....	91–99
7. The unitary symmetric monoidal model category of small $C^*$ -categories Ivo Dell’Ambrogio .....	101–127
8. Weight structure on Kontsevich’s noncommutative mixed motives Gonçalo Tabuada .....	129–142
9. The equivariant slice filtration: a primer Michael A. Hill .....	143–166
10. Homology decompositions and groups inducing fusion systems Assaf Libman and Nora Seeliger .....	167–187

*continued on the facing overleaf*

*Homology, Homotopy and Applications*

Volume **14**(2), 2012

*continued from back cover*

11. Every binary self-dual code arises from Hilbert symbols Ted Chinburg and Ying Zhang .....	189–196
12. Chromatic subdivision of a simplicial complex Dmitry N. Kozlov .....	197–209
13. $K$ -motives of algebraic varieties Grigory Garkusha and Ivan Panin .....	211–264
14. Quillen model structures on the category of graphs Jean-Marie Droz .....	265–284
