
Georgios Daskalopoulos

Dr. Georgios Daskalopoulos received his PhD from University of Chicago in 1989. After that he became CLE Moore instructor in MIT until 1992. Between 1992 and 1994, he took a position of assistant professor of Mathematics in Princeton University. During 1994 to 1999, he became an associate professor in Brown University. After spending two years in Institute of Advanced Study, he held the position of a professor in Brown University. His research interests include differential geometry, gauge theory and complex geometry.

Professor Yau has always welcomed me in his mathematical family and offered invaluable advice throughout my career. With his deep mathematical insights but also with his warm and incredibly gifted personality, Prof. Yau has served as a beacon light to me and many others who work in the field of geometric analysis. On the occasion of his 70th birthday I would like to express my gratitude and wish Prof. Yau many more years of successful presence as the leader in the field.
