

## CONTENTS

<b>A symplectically non-squeezable small set and the regular coisotropic capacity,</b> <i>Jan Swoboda and Fabian Ziltener</i> .....	509
<b>Capping off open books and the Ozsváth–Szabó contact invariant,</b> <i>John A. Baldwin</i> .....	525
<b>A proof of the classification theorem of over-twisted contact structures via convex surface theory,</b> <i>Yang Huang</i> .....	563
<b>Degeneration of Kähler structures and half-form quantization of toric varieties,</b> <i>William D. Kirwin, José M. Mourão and João P. Nunes</i> .....	603
<b>Homoclinic points and Floer homology,</b> <i>Sonja Hohloch</i> .....	645
