CONTENTS OF VOLUME 8

Abanto-Valle, Carlos A., Dey, Dipak K., and Jiang, Xun. Binary state space mixed models with flexible link functions: a case study on deep brain stimulation on attention reaction time 187–194

Abanto-Valle, Carlos A. *See* Lachos, Victor H., Chen, Ming-Hui, Abanto-Valle, Carlos A., and Azevedo, Caio L. N. 203–215

Azais, Jean-Marc. *See* Chassan, Malika, Azais, Jean-Marc, Buscarlet, Guillaume, and Suard, Norbert 71–84

Azevedo, Caio L. N. *See* Lachos, Victor H., Chen, Ming-Hui, Abanto-Valle, Carlos A., and Azevedo, Caio L. N. 203–215

Bao, Le, Raftery, Adrian E., and Reddy, Amala. Estimating the sizes of populations at risk of HIV infection from multiple data sources using a Bayesian hierarchical model 125–136

Brennan, Meghan. *See* Valdes, Camilo, Brennan, Meghan, Clarke, Bertrand, and Clarke, Jennifer 477–494

Buscarlet, Guillaume. *See* Chassan, Malika, Azais, Jean-Marc, Buscarlet, Guillaume, and Suard, Norbert 71–84

Cai, Zongwu, Su, Jia, and Sufianti. A regression analysis of expected shortfall 295–303

Canale, Antonio and Dunson, David B. Bayesian multivariate mixed-scale density estimation 195–201

Chassan, Malika, Azais, Jean-Marc, Buscarlet, Guillaume, and Suard, Norbert. A proportional hazard model for storm occurrence risk 71–84

Chen, Bin and Ye, Keying. Componentwise variable selection in finite mixture regression 239–254

Chen, Ming-Hui and Zhang, Heping. Editorial: Special Issue on Modern Bayesian Statistics (Part II) 123–124

Chen, Ming-Hui. *See* Lachos, Victor H., Chen, Ming-Hui, Abanto-Valle, Carlos A., and Azevedo, Caio L. N. 203–215

Chen, Xiaowei, Chung, Dongjun, Stefani, Giovanni, Slack, Frank J., and Zhao, Hongyu. Statistical issues in binding site identification through CLIP-seq 419–436

Chen, Yuguo. *See* Zhang, Jingfei and Chen, Yuguo 267–276

Chung, Dongjun. *See* Chen, Xiaowei, Chung, Dongjun, Stefani, Giovanni, Slack, Frank J., and Zhao, Hongyu 419–436

Clarke, Bertrand, Valdes, Camilo, Dobra, Adrian, and Clarke, Jennifer. A Bayes testing approach to metagenomic profiling in bacteria 173–185

Clarke, Bertrand. *See* Valdes, Camilo, Brennan, Meghan, Clarke, Bertrand, and Clarke, Jennifer 477–494

Clarke, Jennifer. *See* Clarke, Bertrand, Valdes, Camilo, Dobra, Adrian, and Clarke, Jennifer 173–185

Clarke, Jennifer. *See* Valdes, Camilo, Brennan, Meghan, Clarke, Bertrand, and Clarke, Jennifer 477–494

Dey, Dipak K. *See* Abanto-Valle, Carlos A., Dey, Dipak K., and Jiang, Xun 187–194

Di, Yanming. Single-gene negative binomial regression models for RNA-Seq data with higher-order asymptotic inference 405–418

Ding, Weijie, Kou, Qiang, Wang, Xueqin, Xu, Qiuya, and You, Na. Single-sample SNP detection by empirical Bayes method using next generation sequencing data 457–462

Dobra, Adrian. *See* Clarke, Bertrand, Valdes, Camilo, Dobra, Adrian, and Clarke, Jennifer 173–185

Dombry, Clément and Ribatet, Mathieu. Functional regular variations, Pareto processes and peaks over threshold 9–17

Dunson, David B. *See* Canale, Antonio and Dunson, David B. 195–201

Dupuis, D. J., Sun, Y., and Wang, Huixia Judy. Detecting change-points in extremes 19–31

Fang, Zheng. *See* Li, Ji, Fang, Zheng, Han, Yi, and Wang, Yan 347–354

Ferreira, Ana. Spatial aggregation and high quantile estimation applied to extreme precipitation 33–43

Friedrich, Tara. *See* Kostka, Dennis, Friedrich, Tara, Holloway, Alisha K., and Pollard, Katherine S. 463–476

Gelman, Andrew. *See* Wang, Wei and Gelman, Andrew 153–160

Gillard, Jonathan and Zhigljavsky, Anatoly. Application of structured low-rank approximation methods for imputing missing values in time series 321–330

Golyandina, Nina and Shlemov, Alex. Variations of singular spectrum analysis for separability improvement: non-orthogonal decompositions of time series 277–294

Grazian, Clara and Liseo, Brunero. Approximate integrated likelihood via ABC methods 161–171

Guo, Beibei, Zang, Yong, and Yuan, Ying. A Bayesian phase I/II clinical trial design in the presence of informative dropouts 217–226

Han, Yi. *See* Li, Ji, Fang, Zheng, Han, Yi, and Wang, Yan 347–354

Haug, Stephan. *See* Klüppelberg, Claudia, Haug, Stephan, and Kuhn, Gabriel 93–107

Holloway, Alisha K. *See* Kostka, Dennis, Friedrich, Tara, Holloway, Alisha K., and Pollard, Katherine S. 463–476

Hsu, Li, Peng, Jie, Wang, Pei, and Zhang, Heping. Editorial: Special Issue on statistical methods for next-generation sequencing data analysis 403–404

Hu, Tao. *See* Zhao, Shishun, Hu, Tao, Ma, Ling, Wang, Peijie, and Sun, Jianguo 367–377

Jiang, Hui and Salzman, Julia. A penalized likelihood approach for robust estimation of isoform expression 437–445

Jiang, Xun. *See* Abanto-Valle, Carlos A., Dey, Dipak K., and Jiang, Xun 187–194

Klüppelberg, Claudia, Haug, Stephan, and Kuhn, Gabriel. Copula structure analysis based on extreme dependence 93–107

Kojadinovic, Ivan, Shang, Hongwei, and Yan, Jun. A class of goodness-of-fit tests for spatial extremes models based on max-stable processes 45–62

Kostka, Dennis, Friedrich, Tara, Holloway, Alisha K., and Pollard, Katherine S. motifDiverge: a model for assessing the statistical significance of gene regulatory motif divergence between two DNA sequences ... 463–476

Kou, Qiang. *See* Ding, Weijie, Kou, Qiang, Wang, Xueqin, Xu, Qiuya, and You, Na ... 457–462

Kuhn, Gabriel. *See* Klüppelberg, Claudia, Haug, Stephan, and Kuhn, Gabriel 93–107
