

Surveys in Differential Geometry

- Vol. 1: Lectures given in 1990
edited by S.-T. Yau and H. Blaine Lawson
- Vol. 2: Lectures given in 1993
edited by C.C. Hsiung and S.-T. Yau
- Vol. 3: Lectures given in 1996
edited by C.C. Hsiung and S.-T. Yau
- Vol. 4: Integrable systems
edited by Chuu Lian Terng and Karen Uhlenbeck
- Vol. 5: Differential geometry inspired by string theory
edited by S.-T. Yau
- Vol. 6: Essay on Einstein manifolds
edited by Claude LeBrun and McKenzie Wang
- Vol. 7: Papers dedicated to Atiyah, Bott, Hirzebruch, and Singer
edited by S.-T. Yau
- Vol. 8: Papers in honor of Calabi, Lawson, Siu, and Uhlenbeck
edited by S.-T. Yau
- Vol. 9: Eigenvalues of Laplacians and other geometric operators
edited by A. Grigor'yan and S.-T. Yau
- Vol. 10: Essays in geometry in memory of S.-S. Chern
edited by S.-T. Yau
- Vol. 11: Metric and comparison geometry
edited by Jeffrey Cheeger and Karsten Grove
- Vol. 12: Geometric flows
edited by Huai-Dong Cao and S.-T. Yau
- Vol. 13: Geometry, analysis, and algebraic geometry
edited by Huai-Dong Cao and S.-T. Yau
- Vol. 14: Geometry of Riemann surfaces and their moduli spaces
edited by Lizhen Ji, Scott A. Wolpert, and S.-T. Yau

Volume IX

Surveys in
Differential Geometry

Eigenvalues of Laplacians
and other geometric operators

Preface

This year, we have decided to concentrate on an important topic in Geometry: the eigenvalues of the Laplacian and other geometric operators. This has been one of the most fundamental subjects in the area. The works on Hodge theory and the heat equation proof of the Hodge theorem certainly show its importance. One of the most dramatic and influential papers was the one by Mark Kac on “How to hear the shape of the drum”, which intimately connected the geometry of a manifold with the spectrum of the Laplacian on it.

A strong understanding of spectral properties of differential operators has deep consequences in Geometry, Physics, Number Theory, Probability Theory, etc. Analytic methods have penetrated also into Discrete Mathematics, where the study of the spectral properties of difference operators leads to deeper understandings of the combinatorial questions on graphs.

This volume is an attempt to survey the diversity of directions unified under the above headings. Although the subject is too big to be covered by a single book, we still believe that the present collection does introduce a substantial part of the subject, and we hope it will be beneficial to geometers and experts from the related areas.

Alexander Grigor'yan and Shing-Tung Yau
April 2004

Contents

Preface	iii
Anomalous diffusion and stability of Harnack inequalities <i>Martin T. Barlow</i>	1
From isoperimetric inequalities to heat kernels via symmetrisation <i>G�erard Besson</i>	27
Discrete Isoperimetric Inequalities <i>Fan Chung</i>	53
An excursion into geometric analysis <i>Tobias H. Colding and William P. Minicozzi II</i>	83
Eigenvalues of elliptic operators and geometric applications <i>Alexander Grigor'yan, Yuri Netrusov, and Shing-Tung Yau</i>	147
Spectral gap, logarithmic Sobolev constant, and geometric bounds <i>Michel Ledoux</i>	219
Discrete Analytic Functions: An Exposition <i>L�aszl�o Lov�asz</i>	241
Conformal properties in classical minimal surface theory <i>William H. Meeks III and Joaqu�ın P�erez</i>	275
Analysis of the Cut Locus via the Heat Kernel <i>Robert Neel and Daniel Stroock</i>	337
Analysis on Riemannian co-compact covers <i>Laurent Saloff-Coste</i>	351
Functoriality and Small Eigenvalues of Laplacian on Riemann Surfaces <i>Freydoon Shahidi</i>	385
The inverse spectral problem <i>Steve Zelditch</i>	401
