18th GÖKOVA GEOMETRY-TOPOLOGY CONFERENCE
May 30 – June 4, 2011

Participants of the 18th Gökova Geometry-Topology Conference

PREFACE

This year, in Gökova, we had many interesting talks on a wide variety of subjects from algebraic geometry and mirror symmetry to algebraic topology and handlebodies of 4-manifolds; and also lectures on conformal field theory by the latest fields medalist Stanislav Smirnov. This volume contains interesting articles from this lively eighteenth Gökova Conference. Special thanks goes to Conan Leung for delivering a mini-course on mirror-symmetry and to all the participants for making this conference a very exciting event. We thank TUBITAK and NSF for funding this conference, and thank IP for printing and distributing these proceedings. We also thank Selahi Durusoy for putting these proceedings together, and we finally thank Hotel Yücelen (which is located on the scenic shores of the Gökova Bay) for supporting and hosting this conference.

March 2012

The Editors

CONTENTS

<i>Flat branes on tori and Fourier transforms in the SYZ programme</i>	1
K. CHAN, C. N. LEUNG, and C. MA	
<i>Conway mutation and alternating links</i>	31
J. E. GREENE	
<i>Action of the cork twist on Floer homology</i>	42
S. AKBULUT and Ç. KARAKURT	
<i>Lefschetz fibrations on cotangent bundles of two-manifolds</i>	53
J. JOHNS	
<i>Nine-dimensional exceptional quotient singularities exist</i>	85
I. CHELTSOV and C. SHRAMOV	
<i>Landau–Ginzburg models — old and new</i>	97
L. KATZARKOV and V. PRZYJALKOWSKI
