Preface

Complex geometry has been extensively studied and developed since the 19th century. It is now one of the central subjects in mathematics. History has played a more important role in mathematics than in other disciplines. The reason is that whatever was proved in mathematics will remain true forever, and hence there is a direct continuity of the past, the present and the future of mathematics. On the other hand, in the huge literature of mathematics, only a few works stand out and exert a big influence on the development of mathematics. A book consisting of seminal papers in complex geometry together with some commentaries will be a valuable source for both students and experts, who want to learn and appreciate a global and historical picture of the subject.

Since Bernhard Riemann is one of the originators of complex geometry and differential geometry, this book includes a selection of the thesis of Riemann on the foundation of complex analysis and his masterpiece on the foundation of geometry. It also includes papers of modern masters: Atiyah, Bott, Chern, Calabi, Chow, Donaldson, Hirzebruch, Kähler, Kodaira, Siu, Uhlenbeck, and Yau. To motivate the selection of these papers, a brief history of complex geometry based on extensive quotes from many experts on both mathematics and research in mathematics is included at the beginning of this book. At the beginning of each selected paper, we have included a brief explanation for the selection.

To see the development of contemporary mathematics through the eyes of one of the most active practitioners and leaders, the book contains a set of commentaries written by Prof. Shing-Tung Yau from his personal perspective on the broad subject of geometric analysis, in particular complex geometry, and its many applications, especially to mathematics physics.

Since only a limited number of papers are reprinted in this book, we have also compiled a list of important papers in geometric analysis in the 20th century. This list is the fruit of many intense and extensive email correspondences with Prof. Shing-Tung Yau and should reflect the perspective of Prof. Yau on the broad subject of geometric analysis. It appears as the last chapter and, we hope, should serve as a guide to geometric analysis and some related subjects.

Contents

Part I

Summary

.....	1
A Historical Glimpse of Some Topics in Complex Geometry	3
<i>Lizhen Ji</i>	

Part II

Comments on Yau and His Work

.....	77
Calabi-Yau Manifolds at the Interface of Mathematics and Physics	81
<i>Shiu-Yuen Cheng, Lizhen Ji, Liping Wang, and Hao Xu</i>	
Shing-Tung Yau, His Mathematics and Writings	109
<i>Lizhen Ji</i>	

Part III

Selected Papers in Complex Geometry

.....	117
Foundations for a General Theory of Functions of a Complex Variable	121
<i>Bernhard Riemann</i>	

The Hypotheses on Which Geometry Is Based	125
<i>Bernhard Riemann</i>	
A Mathematical Work That Seeks to Answer the Question Posed by the Most Distinguished Academy of Paris	129
<i>Bernhard Riemann</i>	
About a Remarkable Hermitian Metric	133
<i>Erich Kähler</i>	
Characteristic Classes of Hermitian Manifolds	149
<i>Shiing-Shen Chern</i>	
On Compact Complex Analytic Varieties	189
<i>Wei-Liang Chow</i>	
The Space of Kähler Metrics	209
<i>Eugenio Calabi</i>	
On Kähler Manifolds with Vanishing Canonical Class	211
<i>Eugenio Calabi</i>	
On a Differential-Geometric Method in the Theory of Analytic Stacks	223
<i>Kunihiko Kodaira</i>	
On Kähler Varieties of Restricted Type	231
<i>Kunihiko Kodaira</i>	
On the Complex Projective Spaces	253
<i>Friedrich Hirzebruch and Kunihiko Kodaira</i>	
A Lefschetz Fixed Point Formula for Elliptic Differential Operators	269
<i>Michael Atiyah and Raoul Bott</i>	
Calabi's Conjecture and Some New Results in Algebraic Geometry	277
<i>Shing-Tung Yau</i>	

**On the Ricci Curvature of a Compact Kähler Manifold and
the Complex Monge-Ampère Equation, I** 285
Shing-Tung Yau

Compact Kähler Manifolds of Positive Bisectional Curvature 349
Yum-Tong Siu and Shing-Tung Yau

**The Complex-Analyticity of Harmonic Maps and the Strong
Rigidity of Compact Kähler Manifolds** 367
Yum-Tong Siu

A New Proof of a Theorem of Narasimhan and Seshadri 411
Simon Donaldson

**Anti Self-Dual Yang-Mills Connections over Complex
Algebraic Surfaces and Stable Vector Bundles** 421
Simon Donaldson

**On the Existence of Hermitian Yang-Mills Connections in
Stable Vector Bundles** 453
Karen Uhlenbeck and Shing-Tung Yau

A Brief History of Kähler Geometry 489
Shing-Tung Yau

Part IV

Selected Commentaries by Shing-Tung Yau

..... 523

Part V

A List of Classic Papers

..... 631

**Some Classic Papers in Geometric Analysis in the 20th
Century** 633

Lizhen Ji and Shing-Tung Yau
