Contents

Preface ix

The Global Existence of Smooth Solutions to Quasilinear Wave Equations. A Very Short Course
Serge Alinhac 1

Evolution Equations and Microlocal Analysis
Jean-Michel Bony 17

Necessary Conditions for the Well Posedness of the Cauchy Problem for Hyperbolic Systems
Antonio Bove and Tatsuo Nishitani 41

An Example of Singular Dynamics for the Nonlinear Schrödinger Equation on Bounded Domains
N. Burq, P. Gérard, and N. Tzvetkov 57

The Cauchy Problem for Some Nonstrictly Hyperbolic Equations with Nonregular Coefficients and its Applications
Ferruccio Colombini and Kunihiko Kajitani 67

The Cauchy Problem for Semilinear Second Order Equations with Finite Degeneracy
Ferruccio Colombini, Tatsuo Nishitani, and Giovanni Taglialatela 85

Solvability and Nonsolvability of Second-Order Evolution Equations
Ferruccio Colombini, Ludovico Pernazza, and François Treves 111

Navier-Stokes Equations with Variable Density
Raphaël Danchin 121

Recent Ill-Posedness Results for the Wave Map System in Critical Spaces
Piero D'Ancona and Vladimir Georgiev 137

Some Results on the Cauchy Problem for Hyperbolic Operators with Non–regular Coefficients
Daniele Del Santo 147

The Question of Solvability
Nils Dencker 159

Singularities of Solutions of Schrödinger Equations for Perturbed Harmonic Oscillators
Shin-ichi Doi 185

Dispersive Estimates for Principally Normal Operators and Applications to Unique Continuation
Herbert Koch and Daniel Tataru 201

On the Small Data Global Existence and Scattering for Systems of Semilinear Wave Equations
Hideo Kubo 219

Well Posedness of 2×2 Systems with $\mathcal{C}^\infty$-Coefficients
Lorenzo Mencherini and Sergio Spagnolo 235

Large Viscous Boundary Layers for Noncharacteristic Nonlinear Hyperbolic Problems
Guy Métivier and Kevin Zumbrun 243

Scalar Local Covariant Fields on a Family of Globally Hyperbolic Manifolds
M. K. Venkatesha Murthy 253

On Lower Bounds of Pseudodifferential Systems
Alberto Parmeggiani 269

A Refined Diagonalization Procedure to Handle Fast Oscillations in Degenerate Hyperbolic Problems
Michael Reissig 295

Analytic Theory for the Quadratic Scattering, Wave Front Set and Application to the Schrödinger Equation
Luc Robbiano and Claude Zuily 319

On Some Stability Theorem of the Steady Flow of Compressible Viscous Fluid with Respect to the Initial Disturbance
Yoshihiro Shibata 341

Initial Boundary Value Problem for the Equations of Ideal Magnetohydrodynamics in a Half Space
Masahiro Takayama 359

Differential Algebra and Completely Integrable Systems
François Treves 365

Diagonalizable Complex Systems, Reduced Dimension and Hermitian Systems I
Jean Vaillant 409

The Cauchy Problem for Hyperbolic Operators Dominated by Time Functions
Seiichiro Wakabayashi 423
