
Contents

1	Compressible Flow and Non-linear Wave Equations	1
1.1	Euler's Equations.....	1
1.2	Irrotational Flow and the Nonlinear Wave Equation	2
1.3	The Equation of Variations and the Acoustical Metric.....	5
1.4	The Fundamental Variations	6
2	The Basic Geometric Construction	11
2.1	Null Foliation Associated with the Acoustical Metric.....	11
2.1.1	Galilean Spacetime	11
2.1.2	Null Foliation and Acoustical Coordinates	12
2.2	A Geometric Interpretation for Function H	19
3	The Acoustical Structure Equations	21
3.1	The Acoustical Structure Equations	21
3.2	The Derivatives of the Rectangular Components of L and \hat{T}	33
4	The Acoustical Curvature	39
4.1	Expressions for Curvature Tensor.....	39
4.2	Regularity for the Acoustical Structure Equations as $\mu \rightarrow 0$	42
4.3	A Remark	45
5	The Fundamental Energy Estimate	47
5.1	Bootstrap Assumptions. Statement of the Theorem	47
5.2	The Multiplier Fields K_0 and K_1 . The Associated Energy-Momentum Density Vectorfields	50
5.3	The Error Integrals	60
5.4	The Estimates for the Error Integrals	63
5.5	Treatment of the Integral Inequalities Depending on t and u . Completion of the Proof.....	76
6	Construction of Commutation Vectorfields	83
6.1	Commutation Vectorfields and Their Deformation Tensors	83
6.2	Preliminary Estimates for the Deformation Tensors	88

7	Outline of the Derived Estimates of Each Order	101
7.1	The Inhomogeneous Wave Equations for the Higher Order Variations. The Recursion Formula for the Source Functions	101
7.2	The First Term in $\tilde{\rho}_n$	104
7.3	The Estimates of the Contribution of the First Term in $\tilde{\rho}_n$ to the Error Integrals	109
8	Regularization of the Propagation Equation for $\Delta \text{tr} \chi$. Estimates for the Top Order Angular Derivatives of χ	129
8.1	Preliminary	129
8.1.1	Regularization of The Propagation Equation	129
8.1.2	Propagation Equations for Higher Order Angular Derivatives	133
8.1.3	Elliptic Theory on $S_{t,u}$	143
8.1.4	Preliminary Estimates for the Solutions of the Propagation Equations	151
8.2	Crucial Lemmas Concerning the Behavior of μ	155
8.3	The Actual Estimates for the Solutions of the Propagation Equations	174
9	Regularization of the Propagation Equation for $\Delta \mu$. Estimates for the Top Order Spatial Derivatives of μ	185
9.1	Regularization of the Propagation Equation	185
9.2	Propagation Equations for the Higher Order Spatial Derivatives	191
9.3	Elliptic Theory on $S_{t,u}$	202
9.4	The Estimates for the Solutions of the Propagation Equations	214
10	Control of the Angular Derivatives of the First Derivatives of the x^i. Assumptions and Estimates in Regard to χ	227
10.1	Preliminary	227
10.2	Estimates for y^i	238
10.2.1	L^∞ Estimates for $R_{i_k} \cdots R_{i_1} y^j$	239
10.2.2	L^2 Estimates for $R_{i_k} \cdots R_{i_1} y^j$	242
10.3	Bounds for the quantities Q_l and P_l	251
10.3.1	Estimates for Q_l	251
10.3.2	Estimates for P_l	262
11	Control of the Spatial Derivatives of the First Derivatives of the x^i. Assumptions and Estimates in Regard to μ	269
11.1	Estimates for $T\hat{T}^i$	269
11.1.1	Basic Lemmas	269
11.1.2	L^∞ Estimates for $T\hat{T}^i$	287
11.1.3	L^2 Estimates for $T\hat{T}^i$	293
11.2	Bounds for Quantities $Q'_{m,l}$ and $P'_{m,l}$	305
11.2.1	Bounds for $Q'_{m,l}$	306
11.2.2	Bounds for $P'_{m,l}$	316

12 Recovery of the Acoustical Assumptions. Estimates for Up to the Next to the Top Order Angular Derivatives of χ and Spatial Derivatives of μ 327

12.1 Estimates for λ_i, y'_i, y_i and r . Establishing the Hypothesis **H0** . . . 327

12.2 The Coercivity Hypothesis **H1, H2** and **H2'**. Estimates for χ' . . . 332

12.3 Estimates for Higher Order Derivatives of χ' and μ 351

13 Derivation of the Basic Properties of μ 381

14 The Error Estimates Involving the Top Order Spatial Derivatives of the Acoustical Entities 397

14.1 The Error Terms Involving the Top Order Spatial Derivatives of the Acoustical Entities 397

14.2 The Borderline Error Integrals 404

14.3 Assumption **J** 405

14.4 The Borderline Estimates Associated to K_0 408

14.4.1 Estimates for the Contribution of (14.56) 408

14.4.2 Estimates for the Contribution of (14.57) 417

14.5 The Borderline Estimates Associated to K_1 423

14.5.1 Estimates for the Contribution of (14.56) 423

14.5.2 Estimates for the Contribution of (14.57) 446

15 The Top Order Energy Estimates 463

15.1 Estimates Associated to K_1 463

15.2 Estimates Associated to K_0 477

16 The Descent Scheme 489

17 The Isoperimetric Inequality. Recovery of Assumption J. Recovery of the Bootstrap Assumption. Proof of the Main Theorem 503

17.1 Recovery of **J**—Preliminary 503

17.2 The Isoperimetric Inequality 505

17.3 Recovery of **J**—Completion 509

17.4 Recovery of the Final Bootstrap Assumption 510

17.5 Completion of the Proof of the Main Theorem 511

18 Sufficient Conditions on the Initial Data for the Formation of a Shock in the Evolution 521

19 The Structure of the Boundary of the Domain of the Maximal Solution 533

19.1 Nature of Singular Hypersurface in Acoustical Differential Structure 533

19.1.1 Preliminary 533

19.1.2 Intrinsic View Point 535

19.1.3 Invariant Curves 537

19.1.4 Extrinsic View Point.....	539
19.2 The Trichotomy Theorem for Past Null Geodesics Ending at Singular Boundary.....	543
19.2.1 Hamiltonian Flow	543
19.2.2 Asymptotic Behavior	545
19.3 Transformation of Coordinates	562
19.4 How \mathcal{H} Looks Like in Rectangular Coordinates in Galilean Spacetime	575
