## Part I: Geometric Topology

### Exotic Topology in Geometry and Dynamics..... 3

*F. Thomas Farrell, Andrey Gogolev, and Pedro Ontaneda*

1	The space of negatively curved metrics . . . . .	4
2	The Teichmüller and the moduli spaces of negatively curved metrics . . . . .	7
3	Bundles with negatively curved fibers . . . . .	13
4	Exotic topology and hyperbolic dynamical systems . . . . .	16
	References . . . . .	20

### A Survey of Surface Braid Groups and the Lower Algebraic

#### *K*-Theory of Their Group Rings..... 23

*John Guaschi and Daniel Juan-Pineda*

1	Introduction . . . . .	24
2	Basic definitions of surface braid groups . . . . .	25
3	Some properties of surface braid groups . . . . .	31
4	Braid groups of the sphere and the projective plane . . . . .	43
5	<i>K</i> -theory of surface braid groups . . . . .	55
	Acknowledgments . . . . .	65
	References . . . . .	65

### The Isomorphism Conjecture for Groups with Generalized Free

#### Product Structure..... 77

*Sayed K. Roushon*

1	Introduction . . . . .	78
2	Lower <i>K</i> -theory and surgery <i>L</i> -theory of groups acting on trees . . . . .	83
3	The isomorphism conjecture for groups acting on trees . . . . .	90
	Acknowledgments . . . . .	115

References . . . . .	115
<b>Group Actions on Banach Spaces</b> . . . . .	121
<i>Piotr W. Nowak</i>	
1 Introduction . . . . .	122
2 Preliminaries . . . . .	123
3 Fixed points . . . . .	126
4 Metrically proper actions . . . . .	139
5 Final remarks . . . . .	143
Acknowledgments . . . . .	144
References . . . . .	144
<b>Topological Spherical Space Forms</b> . . . . .	151
<i>Ian Hambleton</i>	
1 Introduction . . . . .	152
2 First steps: pre-1960 . . . . .	152
3 Swan complexes: 1960–1970 . . . . .	154
4 Semicharacteristic obstructions and 3-manifolds . . . . .	156
5 Poincaré complexes . . . . .	156
6 Surgery theory and stable existence . . . . .	158
7 The finiteness obstruction . . . . .	159
8 Space forms in the period dimension . . . . .	160
9 Topological Euclidean space forms . . . . .	161
10 Further topics . . . . .	162
References . . . . .	163
<b>Part II: Representations and Deformations</b>	
<b>Dynamics on Character Varieties: A Survey</b> . . . . .	175
<i>Richard D. Canary</i>	
1 Overview . . . . .	176
2 Basic definitions . . . . .	177
3 Teichmüller space . . . . .	180
4 Convex cocompact representations . . . . .	182
5 Hitchin representations . . . . .	183
6 Anosov representations . . . . .	184
7 $\mathrm{PSL}(2, \mathbb{C})$ -character varieties . . . . .	186

8 Appendix . . . . .	192
References . . . . .	196
<b>Higgs Bundles and Representations of Complex Hyperbolic</b>	
<b>Lattices</b> . . . . .	201
<i>Julien Maubon</i>	
1 Introduction . . . . .	202
2 The symmetric space $SU(p, q)/S(U(p) \times U(q))$ . . . . .	206
3 Representations, flat bundles, Higgs bundles . . . . .	209
4 Proof of the Milnor-Wood type inequality . . . . .	230
5 Maximal representations . . . . .	236
References . . . . .	241
<b>Geometric Limits of Kleinian Groups and Their Applications</b> . . . . . 245	
<i>Ken'ichi Ohshika</i>	
1 Introduction . . . . .	246
2 Preliminaries . . . . .	248
3 Examples of geometric limits . . . . .	251
4 Classification of geometric limits . . . . .	254
5 Boundaries of deformation spaces . . . . .	262
References . . . . .	267
<b>Deformations of Surfaces Embedded in 4-dimensional Manifolds</b>	
<b>and Their Mapping Class Groups</b> . . . . . 271	
<i>Susumu Hirose</i>	
1 Introduction . . . . .	272
2 Preliminaries . . . . .	273
3 Surfaces standardly embedded in $S^4$ . . . . .	274
4 Flexible surfaces in 4-manifolds . . . . .	289
5 Knotted embeddings in $S^4$ . . . . .	290
6 Problems . . . . .	291
Acknowledgments . . . . .	292
References . . . . .	293
<b>On the Geography of Lefschetz Fibrations</b> . . . . . 297	
<i>Naoyuki Monden</i>	
1 Introduction . . . . .	298

2	Lefschetz fibrations . . . . .	299
3	Examples of Lefschetz fibrations . . . . .	302
4	Signatures of Lefschetz fibrations . . . . .	304
5	Fundamental groups of Lefschetz fibrations . . . . .	306
6	Some methods to construct Lefschetz fibrations . . . . .	307
7	Sections of Lefschetz fibrations . . . . .	310
8	The geography problems of symplectic 4-manifolds and Lefschetz fibrations . . . . .	314
9	Holomorphic and non-holomorphic Lefschetz fibrations . . . . .	321
10	The slopes of Lefschetz fibrations with $b_2^+ = 1$ . . . . .	324
	Acknowledgments . . . . .	325
	References . . . . .	325

### Part III: Geometric Groups

<b>The Modular Group and Its Actions</b> . . . . .	333	
<i>A. Muhammed Uludağ</i>		
1	Introduction . . . . .	334
2	Rise of the modular group . . . . .	335
3	The bipartite Farey tree $\mathcal{F}$ and its boundary . . . . .	343
4	The projective general linear group over $\mathbb{Z}$ . . . . .	348
5	Action on the upper half plane $\mathcal{H}$ . . . . .	352
6	Modular graphs and dessins . . . . .	355
7	The action on binary quadratic forms . . . . .	362
8	Et cetera . . . . .	363
	Appendix: Gosper's algorithm for continued fraction arithmetic . . . . .	363
	Acknowledgments . . . . .	367
	References . . . . .	367
<b>Groups with Structures and Homotopy Groups</b> . . . . .	371	
<i>Jie Wu</i>		
1	Introduction . . . . .	372
2	Simplicial groups . . . . .	373
3	Simplicial structure on geometric groups . . . . .	385
	Acknowledgments . . . . .	393

References . . . . .	393
<b>Abstract Homomorphisms of Algebraic Groups and</b>	
<b>Applications</b> . . . . .	397
<i>Igor A. Rapinchuk</i>	
1 Introduction . . . . .	398
2 On algebraic rings . . . . .	404
3 $K$ -theoretic background . . . . .	410
4 Rigidity results over commutative rings . . . . .	415
5 Rigidity results over noncommutative rings . . . . .	429
6 Applications to character varieties and deformations of representations . . . . .	434
Acknowledgments . . . . .	443
References . . . . .	444
<b>Part IV: Geometric Invariants and Growth of Discrete Groups</b>	
<b>Some Topics in Geometric Invariant Theory over Non-algebraically</b>	
<b>Closed Fields</b> . . . . .	451
<i>Dào Phương Bắc and Nguyễn Quốc Thắng</i>	
1 Introduction . . . . .	452
2 An overview of geometric invariant theory. Observability and related notions . . . . .	452
3 Stability in geometric invariant theory over non-algebraically closed fields . . . . .	466
4 Topology of relative orbits for actions of algebraic groups over completely valued fields . . . . .	470
Acknowledgments . . . . .	473
References . . . . .	473
<b>Computation of the Spherical Growth Series of Finitely Generated</b>	
<b>Groups and Monoids by Using Automata</b> . . . . .	479
<i>Michihiko Fujii</i>	
1 Introduction . . . . .	480
2 Finite-state automata and the subset construction . . . . .	482
3 Unique-geodesic word acceptors for groups and monoids, and growth series . . . . .	485

4	Examples of rational growth series and irrational growth series . . .	491
5	The spherical growth series of Artin groups and Artin monoids . . .	493
6	The pure Artin group $P_{I_2(k)}$ and the monoid $P_{I_2(k)}^+$ of dihedral type . . . . .	500
7	Automata for geodesic representatives of $P_{I_2(k)}^+$ . . . . .	503
8	Unique-geodesic word acceptors constructed by subset construction . . . . .	505
9	The spherical growth series of $P_{I_2(k)}^+$ . . . . .	513
10	The spherical growth series of $P_{I_2(k)}$ . . . . .	515
	Acknowledgments . . . . .	516
	References . . . . .	516

## Part V: Music and Group Actions

<b>Mathematics and Group Theory in Music</b> . . . . .	525	
<i>Athanase Papadopoulos</i>		
1	Introduction . . . . .	526
2	A brief overview of the interaction between mathematics and music . . . . .	526
3	The music of Olivier Messiaen . . . . .	540
4	Rhythm . . . . .	542
5	Counterpoint . . . . .	550
6	Modes of limited transposition . . . . .	559
	References . . . . .	565
