Robert at the IAS in Princeton
Shing-Tung Yau **1**
Recollections of Robert Bartnik
Neill Trudinger. **5**
A man of generosity
Hubert Bray **7**
A personal experience with Robert Bartnik
Pengzi Miao **9**
On Bartnik's work
Gregory J. Galloway **11**

Articles

with Leon Simon, "Spacelike hypersurfaces with prescribed boundary values and mean curvature", *Communications in Mathematical Physics* **87** 131–152 (1982), Springer-Verlag. **13**

"The existence of maximal surfaces", in *Proceedings of the Centre for Mathematical Analysis 5: Mini-Conference on Operator Theory & PDE, Canberra, July 1983*. Mathematical Sciences Institute, Australian National University, 1984. . . . . **35**

"Existence of maximal surfaces in asymptotically flat spacetimes", *Communications in Mathematical Physics* **94** 155–175 (1984), Springer-Verlag.. . . . . **41**

On three articles by Robert Bartnik
Lydia Bieri **63**

"The mass of an asymptotically flat manifold", *Communications on Pure and Applied Mathematics* **39** 661–693 (1986), John Wiley & Sons Inc. **67**

"Maximal surfaces and general relativity", in *Proceedings of the Centre for Mathematical Analysis, vol. 12: 2nd Mini-Conference on Geometry and PDE, Canberra, 1986*. Mathematical Sciences Institute, Australian National University, 1987. . . . . **101**

"Remarks on cosmological spacetimes and constant mean curvature surfaces", *Communications in Mathematical Physics* **117** (4) 615–624 (1988), Springer-Verlag. **127**

On checking conjectures numerically
Piotr Bizoń. **137**

My collaboration with Robert
Todd A. Oliynyk. **139**

with John McKinnon, "Particle-like solutions of the Einstein–Yang–Mills equations", *Physical Review Letters* **61** (2) 141–144 (1988), American Physical Society. **143**

"Regularity of variational maximal surfaces", *Acta Mathematica* **161**, 145–181 (1988), Institut Mittag-Leffler. **147**

Some personal comments on some of Robert Bartnik's papers
Carla Cederbaum. **185**

"New definition of quasi-local mass", *Physical Review Letters* **62** (20) 2346–2348 (1989), American Physical Society. **187**

"Results and conjectures in mathematical relativity", in *Proceedings of the Centre for Mathematical Analysis: Mini-Conference on Geometry and Physics, Canberra, February 1989.* Mathematical Sciences Institute, Australian National University, 1990. . . . . **191**

"Some open problems in mathematical relativity", in *Proceedings of the Centre for Mathematical Analysis, vol. 19: Conference on Mathematical Relativity, Canberra, 1988.* Mathematical Sciences Institute, Australian National University, 1989. . . . . **223**

"Isolated singular points of Lorentzian mean curvature hypersurfaces", *Indiana University Mathematics Journal* **38** (4), 811–827 (1989), Indiana University. Retrieved 4 Feb. 2021 from www.jstor.org/stable/24895369. . . . . **249**

with P.T. Chruściel & N.O. Murchadha, "On maximal surfaces in asymptotically flat spacetimes", *Communications in Mathematical Physics* **130**, 95–109 (1990), Springer-Verlag. **267**

"The spherically symmetric Einstein Yang–Mills equations", in *Relativity Today: Proceedings of the Third Hungarian Relativity Workshop, Tihany 1989*. ed. Z. Perjés, pp. 221–240, Nova Science, Commack, New York, 1991. . . . . **283**

"Energy in general relativity", in *Tsing Hua Lectures on Geometry and Analysis*, 5–27, International Press of Boston, 1997. . . . . **303**

"Quasi-spherical metrics and prescribed scalar curvature", *Journal of Differential Geometry* **37** (1) 31–71 (1993), International Press of Boston. **327**

with Gyula Fodor, "On the restricted validity of the thin sandwich conjecture", *Physical Review Letters* **48** (8) 3596–3599 (1993), American Physical Society.. . . . . **369**

"Aspects of the Einstein contraint equations", in *Proceedings of the Eleventh International Congress of Mathematical Physics*, 593–498. International Press of Boston, 1994.. . . . . **373**

"Introduction to differential geometry", in *Proceedings of the Centre for Mathematical Analysis, vol. 34*: *International Workshop on Analysis & Geometry Part 2.* Mathematical Sciences Institute, Australian National University, 1996. . . . . **379**

"The wave equation", in *Proceedings of the Centre for Mathematical Analysis, vol. 34*: *International Workshop on Analysis & Geometry Part 2.* Mathematical Sciences Institute, Australian National University, 1996. . . . . **419**

"General relativity", in *Proceedings of the Centre for Mathematical Analysis, vol. 34*: *International Workshop on Analysis & Geometry Part 2.* Australian National University, 1996. . . . . **429**

"The structure of spherically symmetric $su(n)$ Yang–Mills fields", *Journal of Mathematical Physics* **38** (7) 3623–3638 (1997), American Institute of Physics. **441**

with Andrew H. Norton, "Numerical solution of the Einstein equations" in *Computational Techniques and Applications: CTAC 97*, eds. J. Noye, M. Teubner and A. Gill, 91–98. World Scientific Publishing, Co., 1998.. . . . . **457**

"Interaction of gravitational waves with a black hole", in *XIIth International Congress of Mathematical Physics,* eds. D. De Wit, A.J, Bracken, M.D. Gould and P.A. Pearce, 3–14. International Press of Boston, 1999.. . . . . **465**

with Robin Balean, "The null time-like boundary problem for Maxwell's equations in Minkowski space", *Proceedings of the Royal Society London A* **454**, 2041–2057 (1998), The Royal Society. **477**

"Shear-free null quasi-spherical space-times", *Journal of Mathematical Physics* **38** (11) 5774–5791 (1997), American Institute of Physics. **495**

"A configuration space for solutions of Maxwell's equations", in *Proceedings of the Centre for Mathematical Analysis: Proceedings of the 2nd Taiwan-Australia Analysis Workshop,* 39–45. Mathematical Sciences Institute, Australian National University, 1999. . . . . **513**

"Einstein equations in the null quasi-spherical gauge", *Classical and Quantum Gravity* **14** (8) 2185–2194 (1997), IOP Publishing Ltd. **521**

with Andrew H. Norton, "Geometric implementation of spherical harmonics", presented at the 9th Computational Techniques and Applications Conference (CTAC99), Australian National University, Canberra, 20–22 September 1999. . . . . **531**

with Andrew H. Norton, "Numerical methods for the Einstein equations in null quasi-spherical coordinates", *SIAM Journal on Scientific Computing* **22** (3) 917–950 (2000), Society for Industrial and Applied Mathematics. **543**

with Gourgen Oganessyan, "A canonical null gauge for the Einstein equations", *General Relativity and Gravitation* **32** (3) 459–470 (2000), Plenum Publishing (Springer-Verlag). **577**

"Assessing accuracy in a numerical Einstein solver", in *Differential Equations and Mathematical Physics*. AMS/IP Studies in Advanced Mathematics, vol. 16. American Mathematical Society and International Press of Boston, 2000. . . . . **589**

"Mass and 3-metrics of non-negative scalar curvature", in *Proceedings of the International Congress of Mathematics* (vol. III, pp. 231–240). Higher Education Press, Beijing, 2002. . . . . **599**

with Andrew H. Norton, "Numerical experiments at null infinity", in *Conformal Structure of Space-Time,* eds. J. Frauendiener and H. Friedrich, 313–326. Springer-Verlag, Berlin, 2002. . . . . **609**

Comments on "The constraint equations"
Jim Isenberg **623**

with Jim Isenberg, "The constraint equations", in *The Einstein Equations and the Large Scale Behavior of Gravitational Fields*, eds. P.T. Chruściel and H. Friedrich, 1–38. Birkhäuser, Basel, 2004. . . . . **625**

"Bondi mass in the NQS gauge", *Classical and Quantum Gravity* **21** (3) S59–S71 (2003), IOP Publishing Ltd. **663**

"Gravity matters", *The Australian Mathematical Society Gazette* **31** (3) 161–164 (July 2014), Australian Mathematical Society. **677**

Comments on "Phase space for the Einstein equations"
Stephen McCormick **681**

"Phase space for the Einstein equations", *Communications in Analysis and Geometry* **13** (5) 845–885 (2005), International Press of Boston. **683**

Working with Robert
Piotr T. Chruściel **725**

with Piotr T. Chruściel, "Boundary value problems for Dirac-type equations", *Journal für die reine und angewandte Mathematik* **579**, 13–73 (2005), Walter de Gruyter. **727**

Comments on "Spherically symmetric dynamical horizons"
Jim Isenberg **789**

with Jim Isenberg, "Spherically symmetric dynamical horizons", *Classical and Quantum Gravity* **23** (7) 2559–2569 (2006), IOP Publishing Ltd. **791**

with Paul Tod, "A note on static metrics", *Classical and Quantum Gravity* **23** (2) 569–571 (2006), IOP Publishing Ltd.. . . . . **803**

with Mark Fisher and Todd A. Oliynyk, "Static spherically symmetric solutions of the $SO(5)$ Einstein Yang–Mills equations", *Journal of Mathematical Physics* **51** (3) 032504 (2010), American Institute of Physics. **807**
